WORK EXPERIENCE

Corra

June 2018 – Present

Progressive Web Application (PWA) Engineer

Montclair, NJ / Remote

- Corra is a global e-commerce agency which develops B2C and B2B storefronts for leading digital brands.
(<https://corra.com/>)
- I took the PWA concept all the way from an idea to a major movement within our company and clientele.
 - Developed an internal proof-of-concept for a Magento PWA with a custom component library.
 - Advocated the vision and advantages of the PWA concept and component library.
 - Responsible for documentation, release notes, developer training and on-boarding.
 - Three live sites on this project - notably <https://www.jomashop.com/> and <https://elemis.com/> - and three more in development.
 - Project has generated over \$11,000,000 in revenue for Corra, and the sites are projected to make over \$200,000,000 for our clients, including an 85% year-over-year revenue increase for one client.
- Technology: React, NodeJS, Magento GraphQL, LESS

PROJECTS

[ShareSheets](#)

Nov. 2019 – June 2020

- A social networking app which allows users to combine all of their social media and professional media profiles into a single QR code.
- Technology: React Native
- Individual Project

[COVID-19 Research](#)

Mar. 2020 – Oct. 2020

- I led a research project on the system dynamics of the global spread of COVID-19, which culminated in a research paper that was published in an Elsevier journal.
- I developed a data analysis dashboard in JavaScript which the project centered around.
- Technology: JavaScript, LaTeX
- Individual Project with oversight from a professor

EDUCATION

Stevens Institute of Technology

(expected) May 2022

BE, Software Engineering

Hoboken, NJ

- GPA: 3.96, Dean's List
- Member of the Engineering Honors Society
- Former treasurer of the photography club, member of the entrepreneurship club
